8.	Authority to prohibit the land disposal of any hazardous waste. Land disposal includes, but is not limited to, landfills, surface impoundments, waste piles, deep injection wells, land treatment facilities, salt dome and bed formations and underground mines or caves. Deep injection cell means a well used for the underground injection of hezardous	\$3004(b) -(g) [Sec. 201]	Yes	\$ 6-703 \$ 6-704 \$ 6-705(a)	
)	oastes other than a well to which \$7010(a) of RCFA applies.				

We believe than States already have this authority through their authority to regulate the treatment, storage and disposal of hazardous waste. However, If a Stare believes it needs new authority to ban a waste from land disposal, we strongly recommend that the State seek the broad statutory authority described above. This recommendation is based primarily on \$3004(g) of RCRA; Section 3004(g) requires EFA to decide whether to prohibit one or more methods of land disposal for every listed or Identified hazardous waste by 1990. Thus, unless a State has statutory authority to ban the land disposal of any such hazardons waste, it may need to amend its statute repeatedly as EPA decides the status of each waste.

If a State decides not to seek or cannot obtain such broad authority, the following list breaks down the various HSWA provisions relating to land disposal bans that States will need to adopt in the coming months and years:

93004(b) \*A. Authority to prohible the disposal of [Sec. 201] any hazardous waste in salt dome and bed formations, underground mines, or caves until a \$3005(c) permit is issued. In addition, authority to prohibit disposal of any bulk liquid hazardous waste in salt dome and bed formations, underground whies, or caves until

! Authority over bulk liquid hazardous waste may be under a hazardous waste or underground Injection central program as long as all RCRA requirements are met.

- (1) It is determined, after notice and opportunity for hearings on the record in the affected area, that such placement is protective of health and the environment and (2) performance and permitting standards for such facilities are adopted.
- B. Authority to prohibit landfilling of bulk or non-containerized liquid hazardous waste.

C. Authority to promulgate regulations that minimize the land-filling of containerized liquid hazardous waste and free liquids in containerized hazardous wastes, and prohibit the landfilling of liquids absorbed in materials that biodegrade or release liquids when compressed.

\$3004(c) [Sec. 201]

\$3004(c) [Sec. 201]

\*E. Authority to prohibit the land disposal, including underground injection into deep injection wells, of the following wastes (including the authority to set more stringent concentration levels for categories A-B):

(A) Liquid hazardous wastes, including free liquids associated with any solid or sludge, containing free cyanides at concentrations greater than or equal to 1000 mg/l.

(B) Liquid hazardous wastes, including free liquids associated with any solid or sludge, containing the following metals \$3004(d),(e),(f) [Sec. 201]

Authority regarding deep injection wells may be under the State's hazardons whate authority or its underground injection control authority as long as all a requirements are met.

(or elements) at concentrations greater than or equal to those specified below:

- (1) arsente and/or compounds (as As) 500 mg/L
- (11) cadmium and/or compounds (as Cd) 100 mg/l
- (III) chronium VI ant/or compounds (as Cr VI) 500 mg/1
- (iv) lead and/or compounds (as Pb) 500 ms/1
- (v) mercury and/or compounds (as Hg) 20 mg/1
- (v1) nickel and/or compounds (as III) 134 mg/1
- (vii) selentum and/or compounds (as Se) 100 mg/1
- (viii) thallium and/or compounds (as 1h) 130 mg/1
- (C) Liquid hazardous vaste having a pl less than or equal to (2.0)
- (D) Liquid hazardous wastes containing polychlorinated biphenyls at concentrations greater than or equal to 50 ppm (E) Hazardous wastes containing halogenated organic compounds in total concentration greater than or equal to 1000 mg/kg
- (F) solvents
- (C) dloxins

disposal will not endange: an

underground source of drinking

water.

Because of legal problems with incorporating future EPA regulations by reference, States pursuing this option should seek only the authority to ban wastes prohibited by EPA rather than seeking to incorporate by reference any EPA land disposal prohibition. As discussed above, we advise states to seek authority to ban the land disposal of any hazardous waste. However, some states may wish to seek authority to ban land disposal of only those hazardous wastes for Which EPA has prohibited land disposal.

<sup>\*\*</sup>States should particularly note this requirement. Since many State statutes pertain only to hazardous waste, States are likely to need now authority to regulate the disposal of nonhazardous waste at Subtille C facilities.

RCRA \$1004					
*42. Authority to regulate hazardous waste that is radioactive except to the extent that the waste is source, special nuclear, or byproduct material as defined by the Atomic Energy Act of 1954, as amended. (68 Stat. 923)	<b>\$1</b> 60 <b>4(27)</b>		Yes	§ 6-703 § 6-705	-

<sup>\*</sup> This is not a HSWA requirement. Until recently there had been some controversy about the scope of EPA's RCRA authority over radioactive viste. EPA has now determined that hazardous vastes are subject to RCRA if they are mixed with source, special nuclear or byproduct material even though source, special nuclear, or byproduct material itself is not subject to RCPA. Thus, States will need to review their authority to ensure that only source, special or laproduct material is excluded from their lazardous vaste jurisdiction. meli
